📍 Duri Kosambi, Cengkareng, West Jakarta, DKI Jakarta, Indonesia

SUMMARY

Results-oriented Software Engineering graduate with 1 year of professional Quality Assurance experience at PT Cartenz Technology. Proven expertise in manual and automation testing (Playwright, Appium/Selenium), GPS and GIS spatial map validation, multi-environment testing, and comprehensive coverage of enterprise web and mobile government applications. Strong understanding of full SDLC testing cycles from test planning to production validation.

EDUCATION

Universitas Terbuka (Open University)

Jakarta, Indonesia

Bachelor of Information Systems — Active Student — entering Semester 3 in Q3 2026

2025 – Present

SMK Negeri 21 Jakarta

Jakarta, Indonesia

Vocational High School — Software Engineering

July 2022 – June 2025

- Represented school at **LKS IT Software Solution for Business** competition, Jakarta Pusat City Level — Grade XI, 2024.
- Represented school at **LKS 3D Game Art** competition, Jakarta Pusat City Level — Grade XII, 2025.
- Leveraged Azure DevOps for test backlog monitoring and task management while orchestrating Git-based version control workflows for automated test suites.

SMP Negeri 264 Jakarta

Jakarta, Indonesia

Junior High School

July 2019 – June 2022

SD Negeri Duri Kosambi 11 Petang

Jakarta, Indonesia

Elementary School

July 2013 – June 2019

EXPERIENCE

PT Cartenz Technology

Jakarta, Indonesia

Quality Assurance Intern

July 2024 – July 2025

- **SmartGov Revenue (Web):** Designed and executed comprehensive functional testing for the BPHTB tax module: taxpayer registration and identity verification, property data submission, payment processing (full, installment, arrears), automated NJOP calculation accuracy, SSPD document generation validation, and printed output verification — across test and regional production environments.
- **SmartGov Revenue (Mobile):** Validated GPS location acquisition accuracy and reliability on Android; tested spatial map distribution for tax territory visualization; verified real-time data synchronization between mobile client and backend REST APIs.
- **SmartGov Retribusi:** Led full feature coverage testing from zero on the newly launched retribution module, including GIS-based interactive spatial map, multi-role account flow validation : admin, field officer, and taxpayer, and end-to-end GPS coordinate accuracy verification between backend service and mobile application.
- **Citigov:** Executed end-to-end business logic testing for BPHTB workflows, covering new user onboarding, self-registration as a taxpayer, and the complete digital form lifecycle.
- Authored structured test case documentation with test scenarios, reproduction steps, test data sets, expected vs actual results; filed detailed defect reports with screenshots and video evidence.
- Performed systematic regression testing after each sprint deployment cycle in both staging and live regional production environments used by government offices.
- Collaborated closely with developers in bug triage sessions; conducted fix re-testing and confirmed defect closure before each production release.
- Implemented automation test suites using **Playwright** for web E2E flows and **Appium on Selenium** for Android mobile automation; reduced repetitive regression effort through script reuse.
- Managed parallel testing across staging and production environments, ensuring validation quality at both pre-release and post-release stages.

RELEVANT PROJECTS

- PresensiQ | Go, Rust, Elixir, PostgreSQL, Kotlin Multiplatform, WebSocket

2025 – Present

 - Architected a secure attendance system with layered security: **PASETO v4 tokens** (Rust Identity Service), role-based access control via **Casbin** (Rust Policy Service), and complete organizational data isolation via **PostgreSQL Row-Level Security**.
 - Applied QA-first discipline throughout development: independent validation of GPS radius thresholds, form time-window edge cases, late-threshold calculations, and token expiration behavior before each deployment.
 - Audit Service (Go):** Immutable, append-only system audit trail ensuring full traceability of all user and system actions. **Submission Service:** enforces geolocation boundaries and time constraints at the API level.
- TemuBelajar | Elixir, WebRTC, WebSocket, Kotlin Multiplatform

2024 – 2025

 - Built and validated real-time **WebRTC peer-to-peer** connections via an Elixir WebSocket Signaling Service, ensuring session reliability, graceful disconnection handling, and matchmaking accuracy.
 - Validated correctness of real-time matchmaking algorithm under concurrent user load and tested multi-service integration across Auth, User, and Social services.

SKILLS

Testing Methodologies: Manual Testing, Functional Testing, Regression Testing, UAT, End-to-End Testing, Exploratory Testing, Boundary Value Analysis, Smoke Testing, Sanity Testing
Automation Tools: Playwright, Appium, Selenium WebDriver
Specialized Testing: GPS Accuracy Validation, GIS Spatial Map Testing, Android Mobile App Testing, Web Application Testing, REST API Testing, Multi-Environment Testing (Staging/Production), Multi-Role Account Flow Testing
Supporting Tools: Git, Postman, Android Studio, Chrome DevTools, Spreadsheet (test case management)
Programming: Kotlin, JavaScript (Playwright test scripts)

CERTIFICATIONS

- Professional Competency Certificate — Junior Mobile Programmer

Indonesia

National Professional Certification Agency (BNSP)

May 2025

 - Nationally recognized professional competency certification issued by the Indonesian Government’s BNSP, obtained through a structured assessment by certified evaluators.
 - Covers mobile application architecture, Android/Kotlin development, REST API integration, UI/UX implementation, and professional mobile development best practices.
- Quality Assurance Internship Certificate

Jakarta, Indonesia

PT Cartenz Technology

July 2025

 - Issued upon completion of a 1-year QA internship, validating competency in functional, regression, and automation testing of enterprise government application platforms.
 - Covers hands-on testing experience in live regional production environments across SmartGov Revenue, SmartGov Retribusi, Mobile App SmartGov Revenue, and Citigov.
